

News Release

Leading analytical services company strengthens customer support team

The UK's leading animal nutrition testing laboratory, Sciantec Analytical Services, is further strengthening its analytical and customer support team with the announcement of two new appointments.

Caitriona Mullin joins Sciantec as a Business Development Manager where she will act as a key interface between the laboratory operations and customers. Building close relationships with customers is seen as a key priority for Sciantec as the company prides itself on its service levels which rely on customer feedback. She will also be involved in developing new business opportunities with existing and new customers throughout the UK and Ireland.

A beef farmer's daughter from Co Galway in Ireland, Caitriona graduated from University College Dublin with an honours degree in Agricultural Science in 2007. Since then she has worked as the Irish Animal Health Business Manager for a large multinational animal health company, subsequently being promoted to European Equine Business Manager.

Outside work Caitriona lists her main interests as horse racing and the GAA (Gaelic Athletic Association).

Mike Robinson has taken the new position of Business Technical Support Manager. He has worked in the animal feed/nutrition sector for some 36 years and for the past 12 years has been Business Development Manager for Sciantec, supporting customers throughout the UK. Mike will be working closely with Caitriona to ensure a smooth transition. He is looking forward to his new role which will allow him to use his experience and expertise more fully and will expand the level of technical support available to Sciantec customers.

Working with Caitriona and Mike, Linda Forbes will continue to focus on the support and development of the forage services and animal health side of the Sciantec business.

Caitriona, Mike and Linda are based at the company's laboratory in Cawood North Yorkshire.

About Sciantec

Sciantec Analytical Services is based in Cawood, North Yorkshire. It was formed in 2006 following the merger of two leading animal feed laboratories and is now one of the largest laboratories operating as a specialist livestock nutrition and animal health facility in the country. The laboratory also provides testing services for the grain and combinable crops sector.

Working to internationally recognised analytical methodology and standards Sciantec's team of skilled scientists offer rapid turnaround combined with high quality results providing the information on which to make sound business decisions. Customers include blue chip companies; livestock advisory consultancies; animal feed and premix manufacturers; pharmaceuticals and diagnostics businesses, contract research organisations; food producers and other specialist laboratories throughout the UK and Ireland.
